

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

User increments count using the "+" button in the tally count app given the user has opened the tally count app when the user clicks the "+" button then the count value should increase by 1 and the app interface should visually reflect the updated count and even when the count value is in negative numbers it can still increase.

2. User story(ies) in Gherkin syntax for the "-" button.

User decrements count using the "-" button in the tally count app given the user has opened the tally count app when the user clicks the "-" button then the count value should decrease by 1 and the app interface should visually reflect the updated count and even when the count value is 0 it can still decrease into negative numbers.
